

Investigator:	Yan Sun Phone: (404) 727-9090 Email: yvsun@emory.edu
Primary Research Interest:	Genetics
Description of Research:	Using genomic, multi-omic and electronic health record data to investigate molecular markers and systems underlying risk for cardio-metabolic diseases and chronic infection in diverse race/ethnic groups, to promote precision medicine, and to address health disparity for better health outcomes among the veteran population.
Relevance to VA:	Leading and collaborating genomics, multi-omics and gene-environment interaction research of cardio-metabolic diseases and infectious disease in diverse veteran population.
